ABOUT US

Established in 2009 we are an industry leader in manufacturing Bedouin stretch tents as permanent or semi-permanent tented structures for events, weddings, parties & corporate functions as well as fixed installations for a variety of applications.

We serve clients from across the globe, providing both standard-sized and customised stretch tent options that are portable and versatile.

STYLISH

Our stylish, next generation Bedouin stretch tents can be designed in any shape or size to fit any location and any occasion.

ELEGANCE

Bedouin-style stretch tents hark back to the mystique of Casablanca and hot desert nights. Dressed up or down, our tents add elegance any occasion.

VERSATILE

Our malleable, highly adaptable tents can be installed virtually anywhere and look good wherever they are erected in any shape or form required.

**We create
space to play,
dance, celebrate
& be inspired in.**

- › Area Covered: 108m²
- › Weight: 108kg
- › Packed Tent Dimensions: 70cm x 70cm x 140cm

Rigging & Installation

- › Riggers Required: 3 - 4
- › Installation Time: 1 - 2 hours

TENT SIZES

Modular by design, combine several tents to cater for the biggest installations possible, far exceeding the capabilities of conventional tents and marquees.

Our stretch tents are the most versatile event tents in the industry. Being able to rig them in a variety of configurations with sides up or down, or a combination of both, means a single tent delivers for so many different applications, and we are yet to find an event we can't provide a solution for. Our unique design also enables one to connect multiple tents in a modular setup to provide the perfect cover for even the biggest installations.

10 x 15 (150m²)

Cinema, dancing or cocktail style seating:
85 pax
Seated at tables: 85 pax

Capacity

- › Seated Dinner: 80 pax
- › Standing Cocktail: 90 pax
- › Seated Cinema: 100 pax

Size & Weight

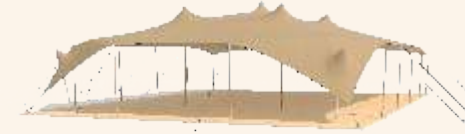

- › Area Covered: 150m²
- › Weight: 150kg
- › Packed Tent Dimensions: 70cm x 70cm x 175cm

Rigging & Installation

- › Riggers Required: 3 - 4
- › Installation Time: 2 - 3 hours

20 x 15 (300m²)

Cinema, dancing or cocktail style seating:
200 pax
Seated at tables: 150 pax

Capacity

- › Seated Dinner: 150 pax
- › Standing Cocktail: 200 pax
- › Seated Cinema: 220 pax

Size & Weight

- › Area Covered: 300m²
- › Weight: 300kg
- › Packed Tent Dimensions: 85cm x 85cm x 190cm

Rigging & Installation

- › Riggers Required: 5 - 6
- › Installation Time: 3 - 4 hours

20 X 25 (500m²)

Cinema, dancing or cocktail style seating:
400 pax
Seated at tables: 325 pax

Capacity

- › Seated Dinner: 300 pax
- › Standing Cocktail: 350 pax

MANUFACTURING

2019 and 2020 will go down as two very challenging years for the global events industry, yet Dimensions Tents & Structures prevailed by expanding our factory operation significantly to meet the increased demand of our export market.

We have dedicated departments for seam work, welding, fabric treatment and printing.

- ✓ Increased floor space
- ✓ Higher output
- ✓ Dedicated manufacturing
- ✓ Improved quality control

FABRICS

We offer two types of fabric: Matte Flex Coated & 3-Ply.

All our stretch tent fabric products are pre-treated with a water repellent, anti-microbial agent and a Teflon finish to ensure longevity of your tent.

All seams are stitched and welded to ensure a 100% waterproof product.

**Advanced
textiles using
state of the art
technology**

DTS 3 – PLY FABRIC

The tensile strength of our new stretch tent fabric outperforms competitors' fabric and is almost twice as strong. Tear strength is greatly improved due to the newly developed interlock knit. Our new fabric will make the Dimensions' stretch tents even more adaptable for different install applications with vastly increased durability.

3-PLY FR LIGHT WEIGHT 550

Designed for rental solutions (Fire Retardant and Non Fire Retardant)

- ✓ Ideal fabric for smaller tent setups
- ✓ 100% waterproof
- ✓ Lightweight for increased mobility and portability
- ✓ Translucent fabric offers great ambiance for intimate events
- ✓ UV stabilised
- ✓ Stitched and welded seems.
- ✓ Perfect fabric for a camping tent, shade tent and for personal use
- ✓ Two year warranty
- ✓ Easy to set up, de-rig and transport
- ✓ Available in a range of fun colours, custom colours available for orders 400/m2 +
- ✓ Designed for small rental teams and smaller rental setups

3-PLY FR ENDURANCE 750

Designed for durable, demanding rental solutions and permanent installations.

- ✓ Thicker overall finish
- ✓ 100% waterproof & fire retardant
- ✓ Increased blackout
- ✓ High Tensile stretch
- ✓ UV Stabilised
- ✓ Stitched and welded seems
- ✓ Brandable with logo/signage
- ✓ Two year warranty
- ✓ Incredibly durable fabric
- ✓ Available in a range of fun colours, custom colours available for orders 400/m2 +
- ✓ Recommended for rental and semi-permanent installations
- ✓ Dimensions has invested in the future of stretch tent rental with the Endurance 750

DTS FLEX COATED FABRIC

Our MATTE FLEX range sets a new standard for stretch tent design and usability which we are confident will outperform competitors. In short, this is the Rolls Royce of tent fabrics with a host of features that make it the smart investment choice.

MATTE FLEX COATED FR 550

Competes with the 750Gsm derivative on quality but in a lighter form factor.

- ✓ 100% waterproof & fire compliant
- ✓ Coated fabric sets new waterproofing and UV stabilisation standards
- ✓ Slick matte finish adds a touch of class and elegance (non-plastic veneer), exclusive to Dimensions
- ✓ Welded and stitched seams and patches
- ✓ Easy to clean and dry
- ✓ Easily add logo/signage for branding
- ✓ Two Year warranty
- ✓ Only stretch tent coated flex fabric to be available in seven colour choices, exclusive to Dimensions
- ✓ Suitable for permanent installations and rental applications

We use a combination of a stitch and weld process to manufacture our tents offering two points of strength: first we stitch the fabrics together when joining and then welding a tape to further makes it 100% waterproof.

MATTE FLEX COATED FR 750

Our tougher 750Gsm FR is perfect for permanent installations and long-term rental solutions.

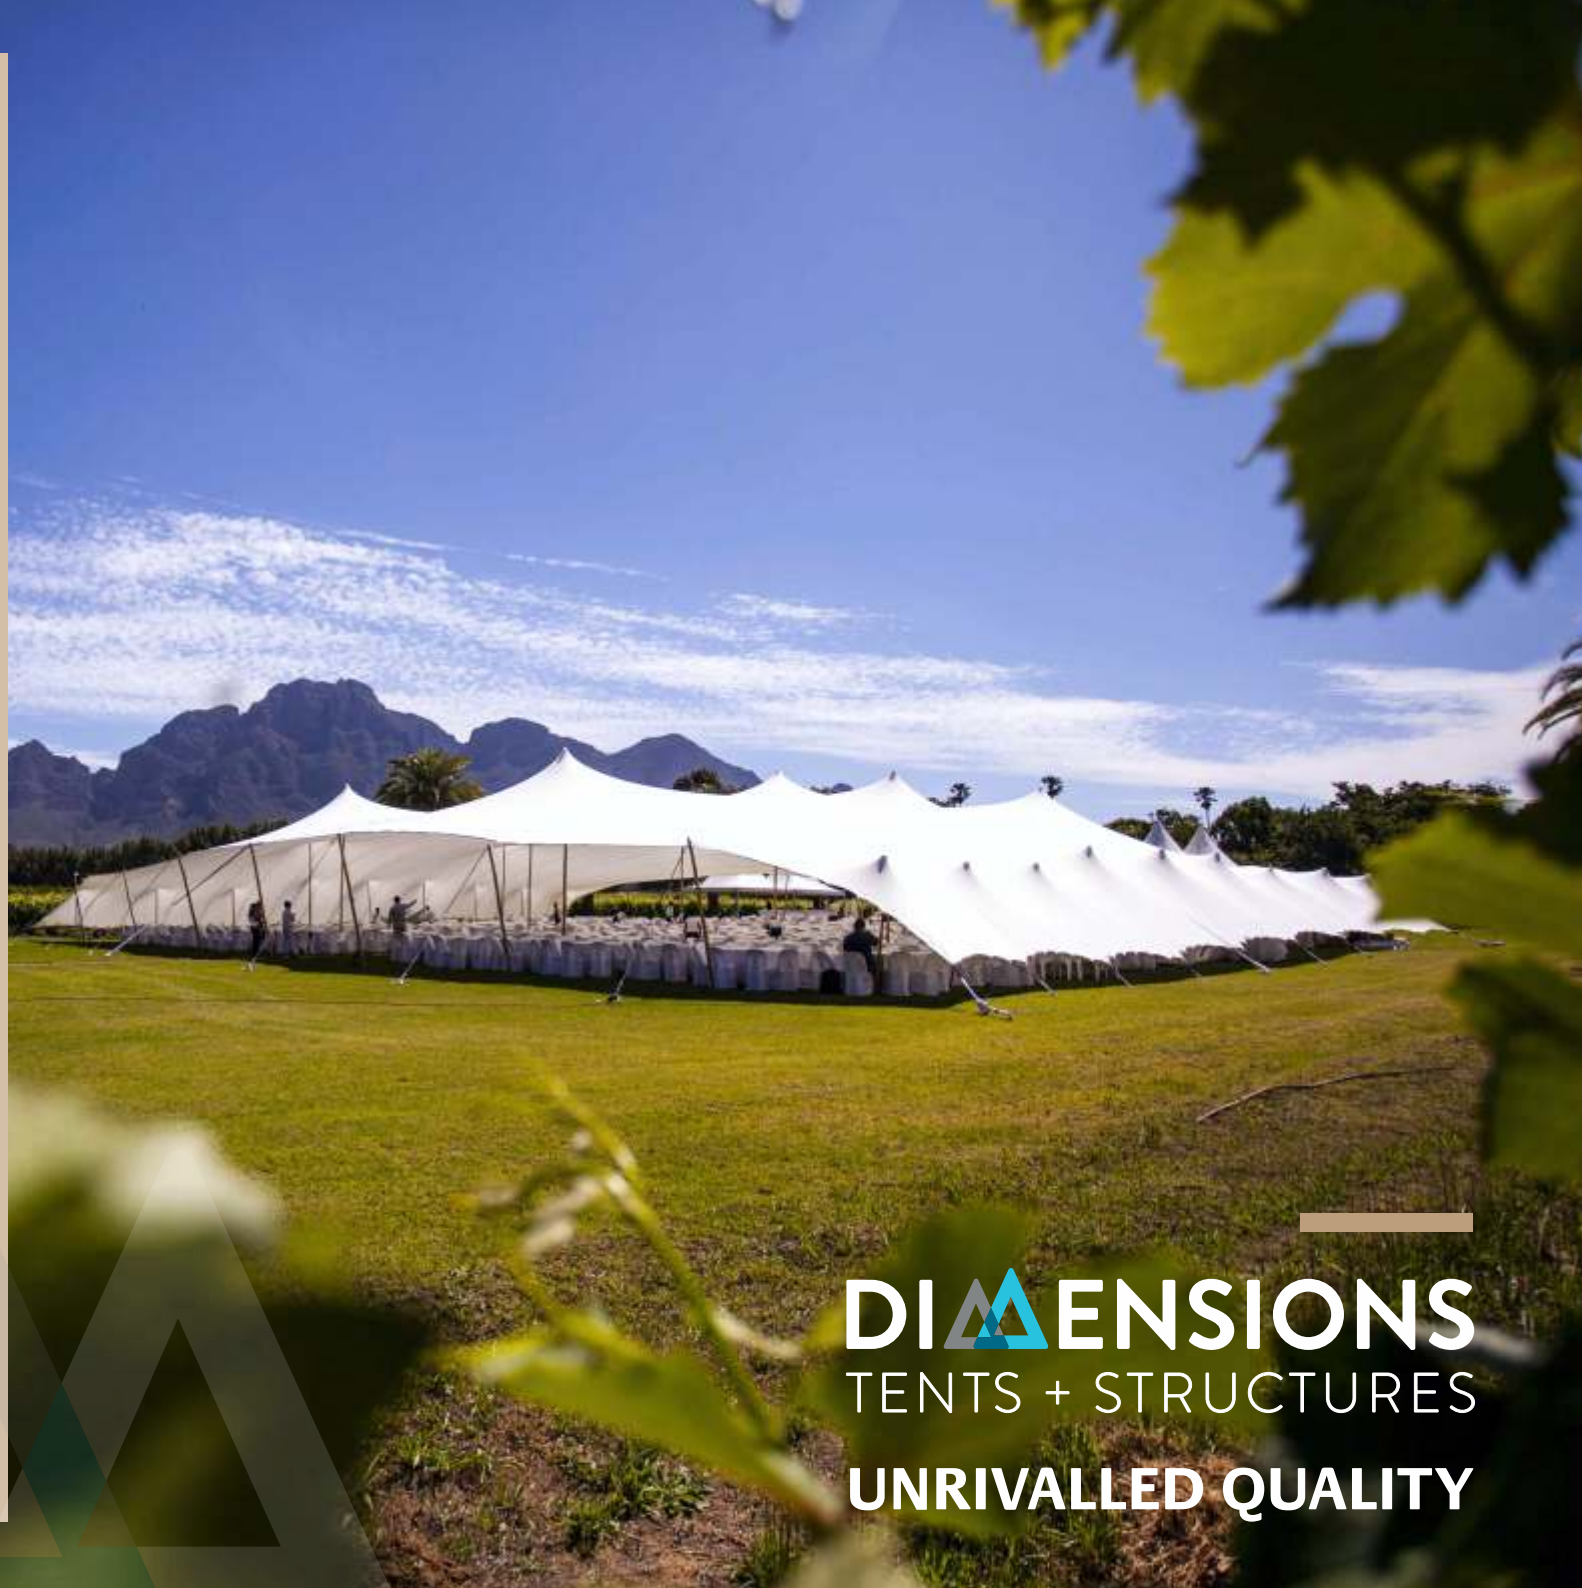

- ✓ 100% waterproof & fire compliant
- ✓ Coated fabric sets new waterproofing and UV stabilisation standards
- ✓ Slick matte finish adds a touch of class and elegance (non-plastic veneer), exclusive to Dimensions
- ✓ Welded and stitched seams and patches
- ✓ Easy to clean and dry
- ✓ Easily add logo/signage for branding
- ✓ Two Year warranty
- ✓ Only stretch tent coated flex fabric to be available in seven colour choices, exclusive to Dimensions
- ✓ Suitable for permanent installations and rental applications

LUXURY TENTED STRUCTURES

We offer four luxury tent designs which vary in shape, size, and style.

Each luxury tent can be customised to suit one's needs.

Internal dividing walls can be added or removed, specialised high-heat resistant fireplace fittings can be installed, and windows and doors can be adapted as per the specific needs of the client.

Our superior quality tents are waterproof, wind and sun resistant and come in a variety of shapes, sizes, and fabric options.

All fabrics have a worldwide fire compliance and safety accreditation with French M2 certification, USA CFM certification and BS British standards certification and are registered with Ten Tech Engineering and Structural certification.

OUR RANGE

Escape | 360 Explorer | Savannah | Nomad Eco Glamper

BEDOUIN STRETCH TENT ROOF

The Bedouin stretch tent roof is custom-tailored and fitted to the steel frame. The Bedouin tent roof can be made in one of two fabric types – premium flex coated or 3ply fabrics.

SHADE CLOTH ROOF OVERLAY

Each luxury unit comes complete with a 90% shade cloth roof overlay. This protects the Bedouin Tent from prolonged UV damage and enhances the life span of the Bedouin tenfold.

RIPSTOP SIDE WALLS AND DOORS

This fabric is super durable and is designed to withstand all weather conditions. The ripstop fabric comes with fire retardant, anti-microbial and UV color locking properties to ensure longevity of the product.

STEEL FRAME

The steel frame comes in an easy to assemble kit with simple instructions to guide you through the construction process. Each Steel frame is broken down into individual bays that bolt together to form the frame.

DIMENSIONS TENTS' WOODEN POLES - CUSTOM MADE FOR STRETCH TENTS

Our perfectly crafted stretch tent poles were designed and developed to add the charm of a wooden organic look as well as perform as the ultimate rigging solution when installing a stretch tent. Our wooden poles are light in weight, yet engineered to meet international regulations. These wooden poles can be fitted with a steel cap or optional eye nut attachment solution. They come with fully treated varnish and are finished with rope for easy handling.

10MM NICKEL PLATED CARABINER

The nickel-plated carabiners are an industry standard when installing a stretch tent. They are used while tensioning the tents and connections of ropes to tents etc. They are an essential tool for attaching tents and rope accessories together and are used for tensioning.

PEGS - 25MM X 1M / 32MM X 1.2M

The 25mm pegs are used for the downlines and smaller tents for pegging into the ground to create attachment points. The 25mm comes with either a hook or bolt finish. The 35mm peg (1.2m long) pegs are used for larger tents on the corners or the downlines on larger tents. These pegs are handy when installing on soft turf areas. The shorter 750mm long pegs are designed for side wall applications. Please note our bolt top pegs are designed for our base plates and rigging plates and our hook pegs for general installations.

76MM POLES FITTED WITH 76MM FOOT CAP / 50MM POLE FITTED WITH A 50MM FOOT CAP

The foot caps are designed to fit the aluminium poles to give a flush, neat finish and to protect the installation surface from the poles. They also offer extra traction on a surface.

50MM POLE (3MM WALL WITH STEEL CAP FITTING 4WAY)

The 4-way steel cap is great when you need multiple attachment points for more technical installations.

DOWNLINE RATCHET TENSIONING KITS

Dimensions Tents has developed a tensioning method between poles and pegs to create the ultimate tension. This replaces the traditional rope tensioning method. Includes colour matching ratchet head cover.

SMALL AND LARGE CORNER RIGGING PLATES

The small and large plates are used for rigging in soft soil conditions. The plates are installed with multiple pegs and can take attachments for tension. This makes rigging a luxury.

BASE PLATE

The base plate is a support mechanism used once the stretch tent is installed and assists with stabilising the tent. The king poles are simply fastened to the base plate and the base plate to the ground. In situations where the pole may lose tension and collapse, the plate maintains the tension and rigidity.

RUBBER HANDLE SLEDGEHAMMER

Our preferred sledgehammer is a dream when hitting in pegs. The rubber handle absorbs the shock allowing for use over long periods. The short handle allows for easy maneuvering. This makes rigging a luxury.

ACCESSORIES

Our comprehensive range of tent accessories means, no matter the requirement, Dimensions is your one-stop stretch tent shop. We supply in bulk or single items.
