RUGGED SAFARI  
MEETS BEDOUIN  
CHIC IN A BLEND  
OF INNOVATION  
AND LUXURY.

EXPERIENCE THE  
GREAT OUTDOORS  
IN COMFORT AND  
STYLE.

Dimensions' Luxury Tents take the best aspects of a safari camping tent and combine these with our trademark stylish Bedouin stretch tents to create a bespoke luxury camping experience.

Dimensions Luxury Tents can literally be setup in any location and have zero ecological impact on the surrounding environment. Units can be installed on a wooden deck or if more permanent, can be setup on a simple bricked foundation.

Our modular design and simple to follow installation guide make these units easy to setup, requiring minimal effort and little manpower to install.

ALL TERRAIN TESTED.  
ZERO  
ENVIRONMENTAL  
IMPACT.

## OUR COLLECTION

We offer four luxury tent designs which vary in shape, size, and style.

Each luxury tent can be customised to suit one's needs.

Internal dividing walls can be added or removed, specialised high-heat resistant fireplace fittings can be installed, and windows and doors can be adapted as per the specific needs of the client.

## ESCAPE

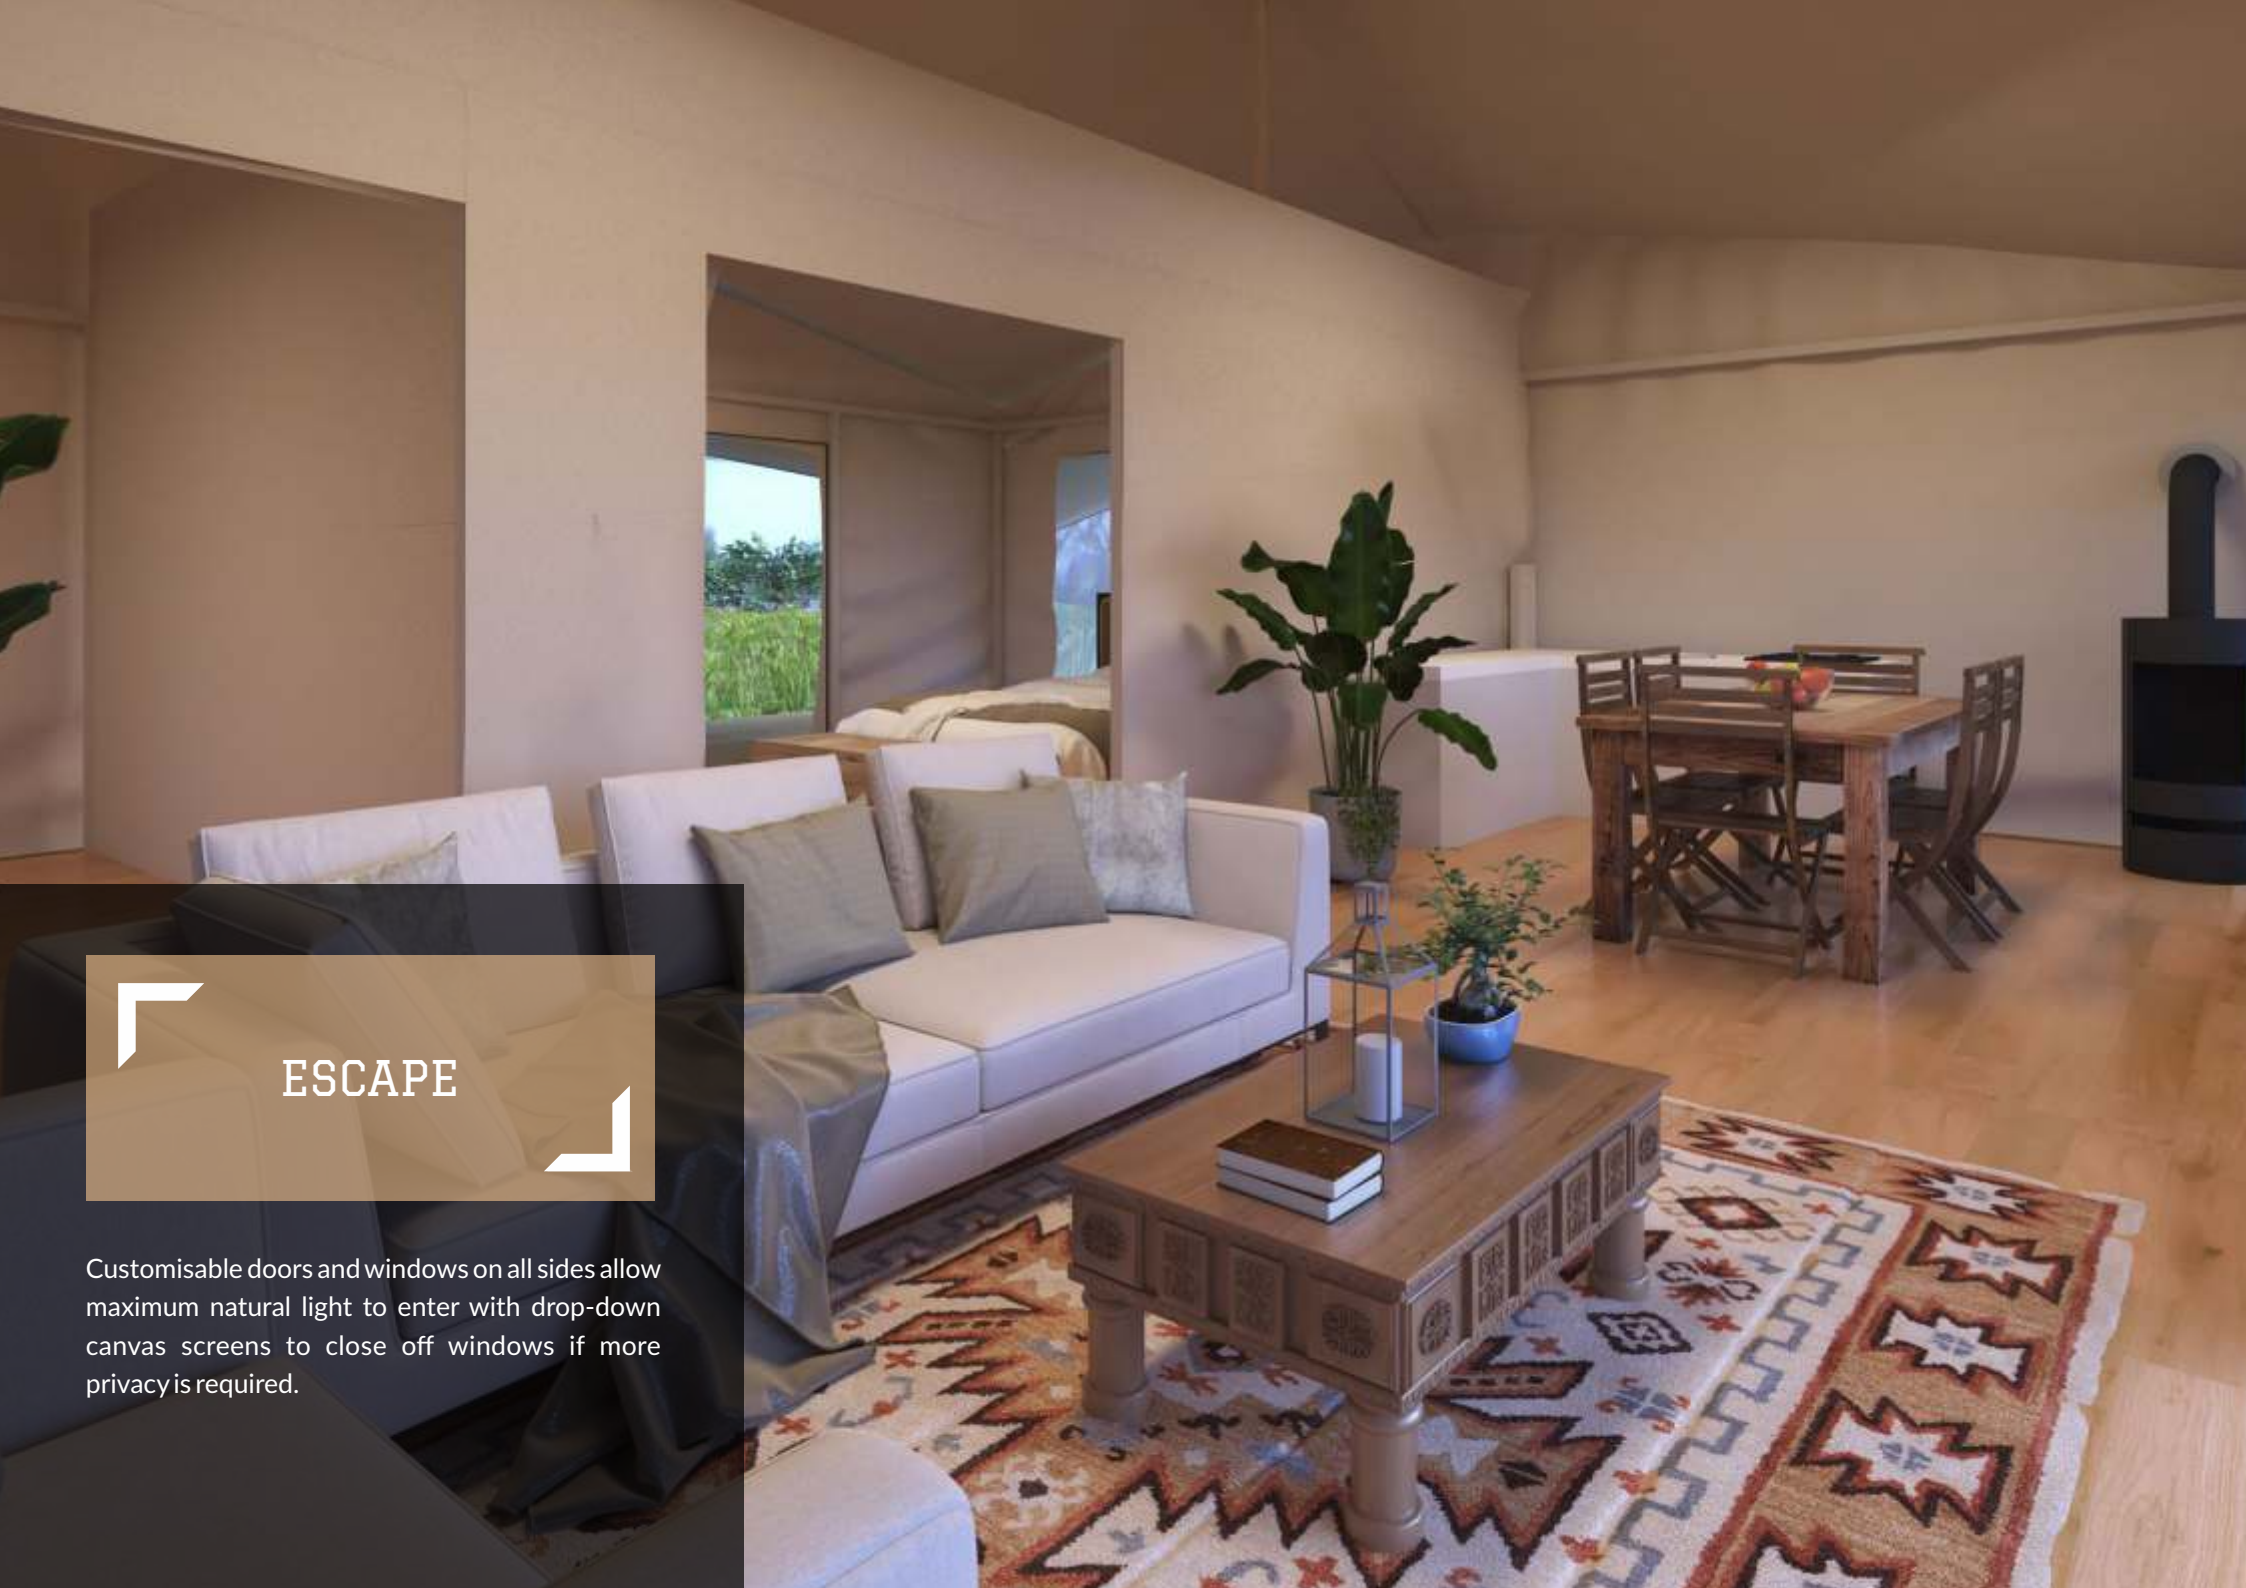

Our most luxurious luxury tent available, the Escape sports four spacious rooms, fully customisable. Standard design includes two spacious master bedrooms of 5.5m x 4.0m (22m<sup>2</sup>), a full bathroom 3.45m x 2.75m (9.50m<sup>2</sup>) and an open plan kitchen and lounge area of 3.45m x 8.20m (28.30m<sup>2</sup>).

The Escape is assembled on a sturdy 11.0m x 7.70m (84.7m<sup>2</sup>) steel frame built over a wood deck or concrete base.

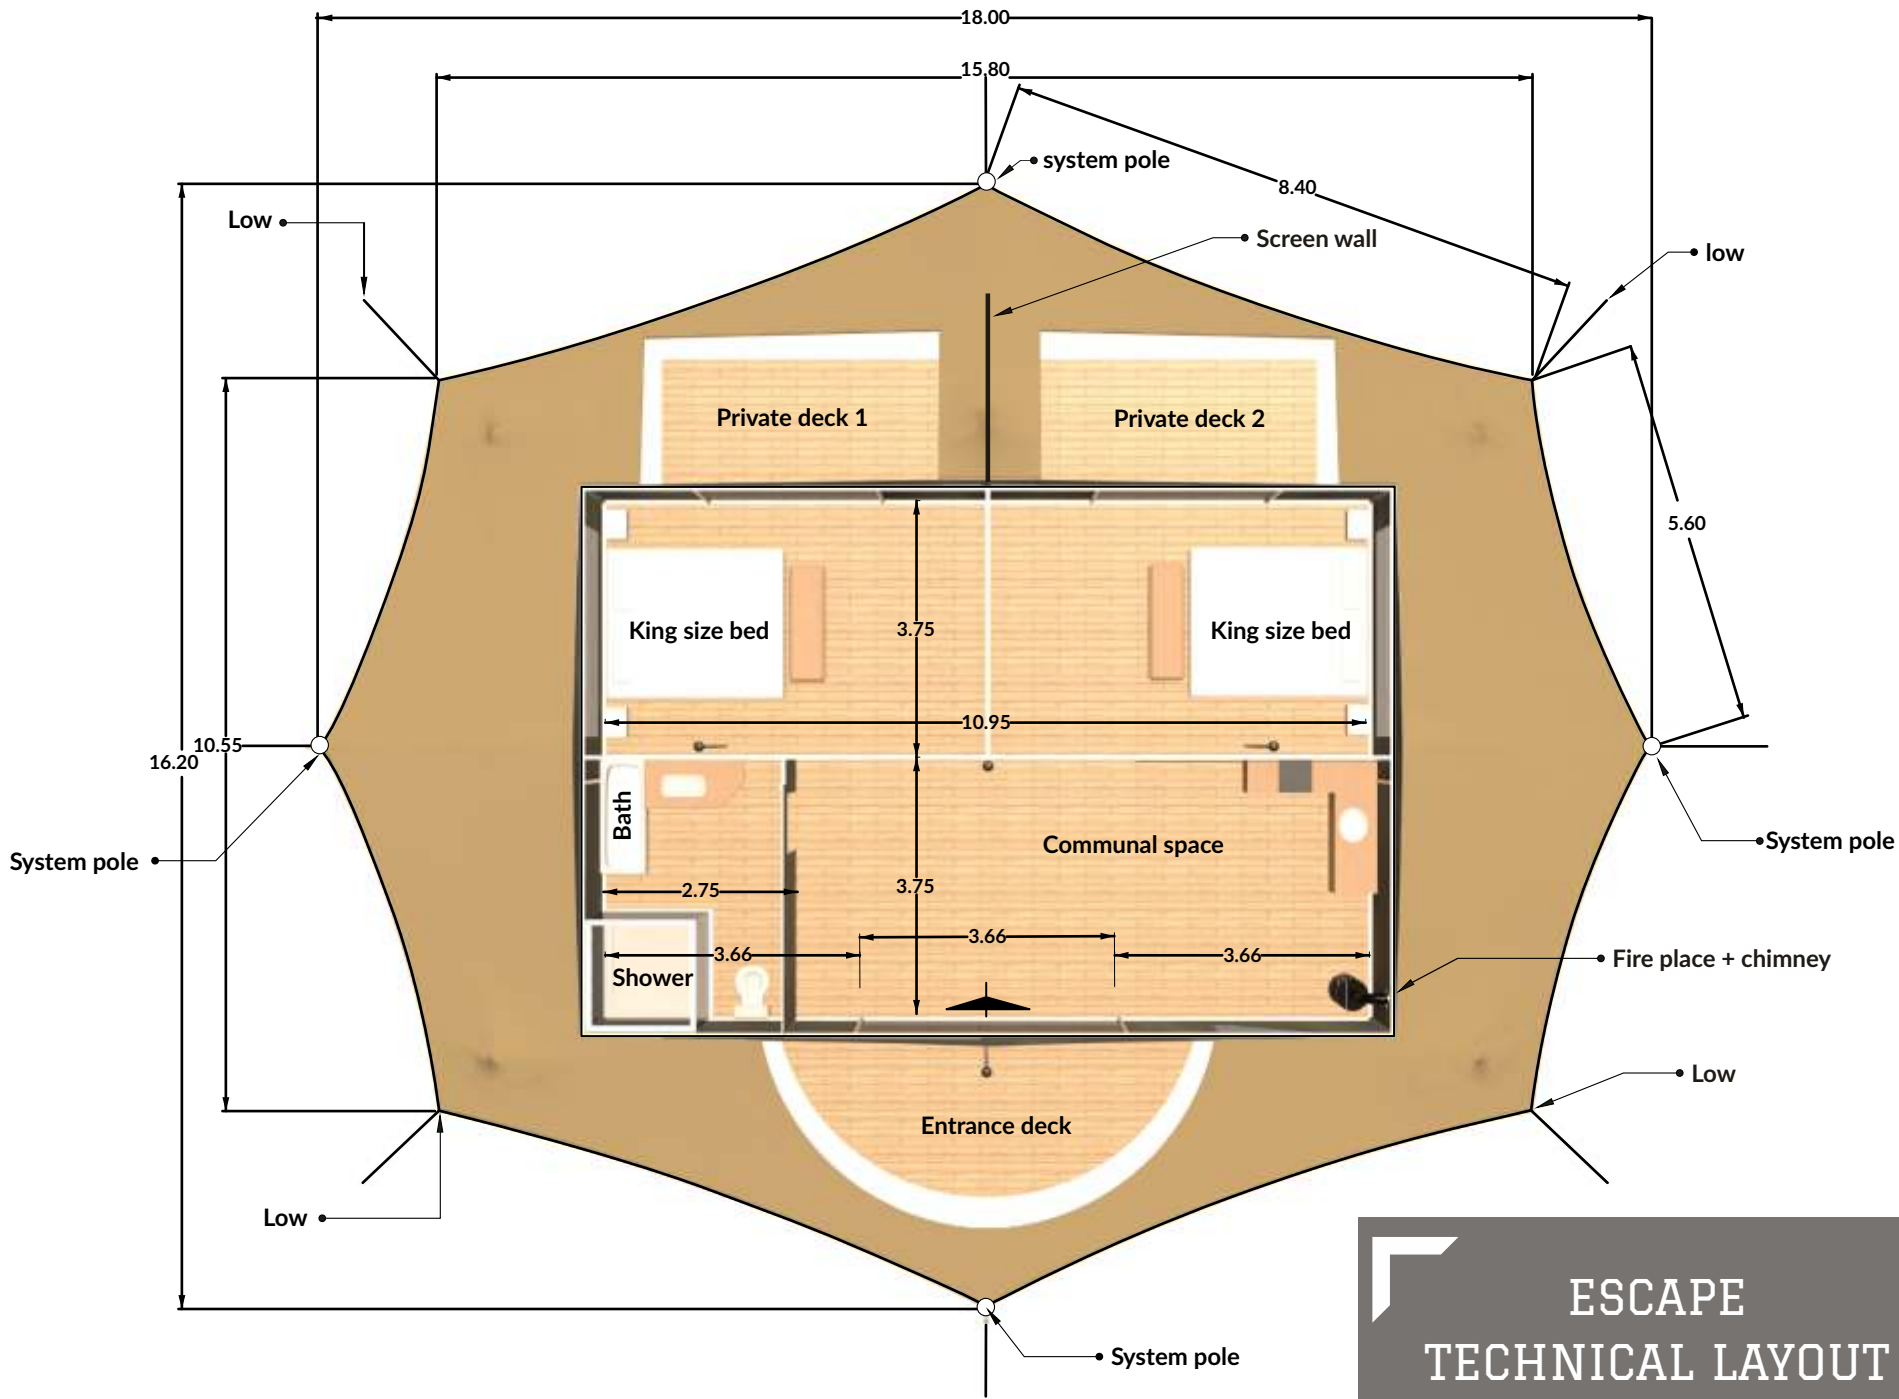

The outer tent layer (roof) consists of a custom cut 15m x 18m (+- 270m<sup>2</sup>) waterproof flex coated Bedouin stretch tent. Between the outer Bedouin stretch tent and steel frame below there is a custom fabric join connecting the two to create an airtight join making this unit suitable for all weather conditions.

## ESCAPE

Customisable doors and windows on all sides allow maximum natural light to enter with drop-down canvas screens to close off windows if more privacy is required.

ESCAPE  
 TECHNICAL LAYOUT

## 360 EXPLORER

The 360 Explorer is a unique six-sided tent with a design inspired by the honeybee using a hexagon as the foundation for an extremely strong and rugged build.

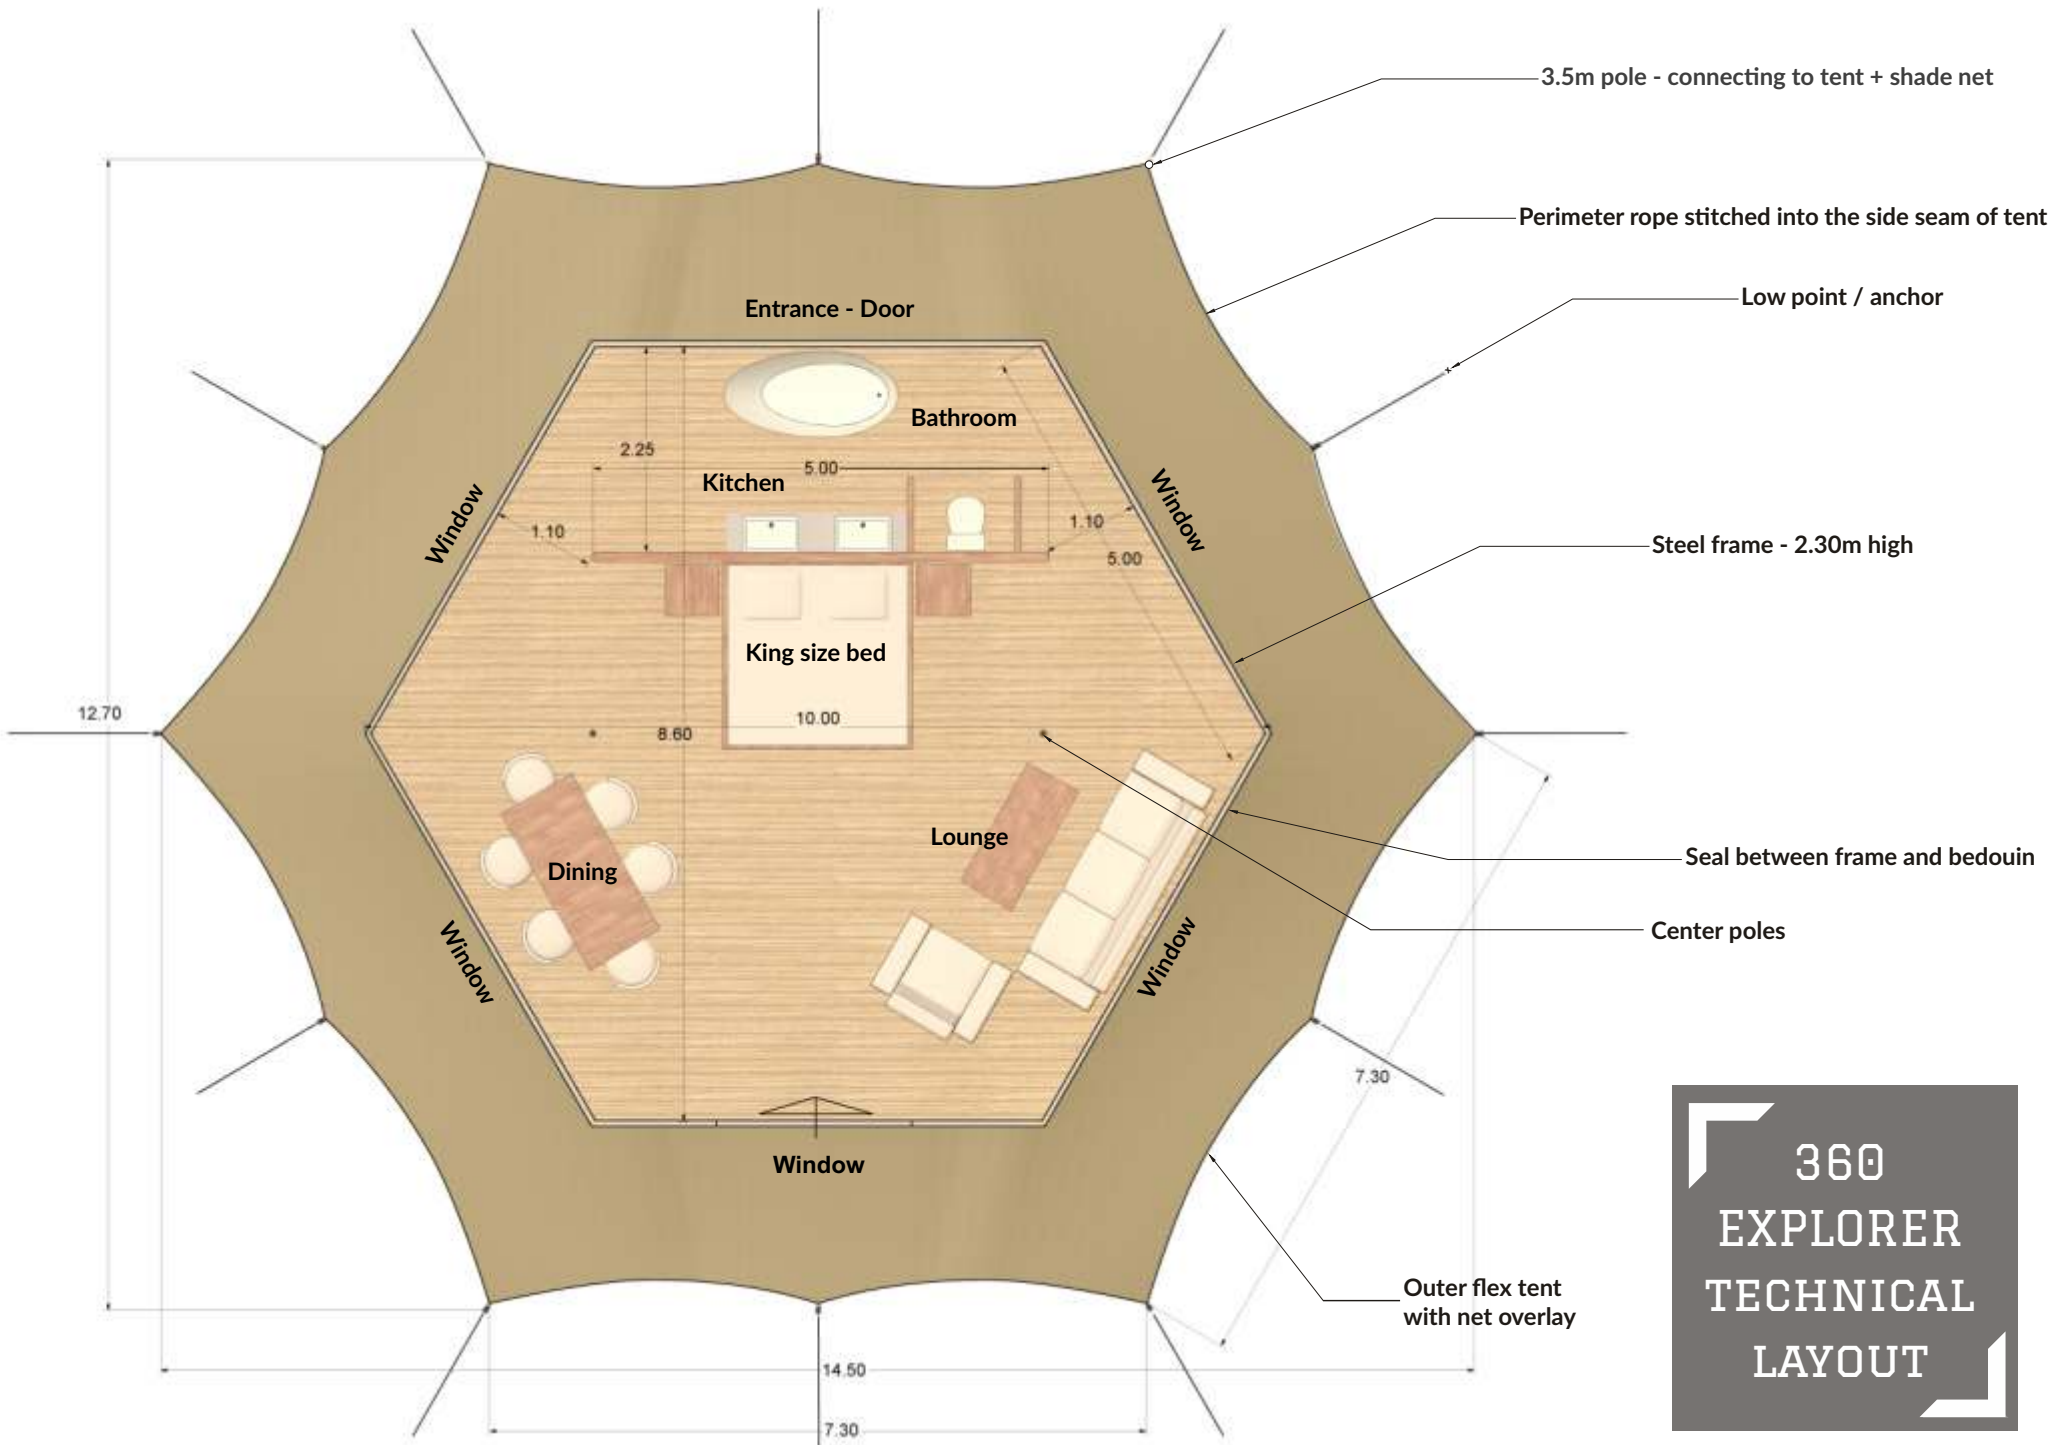

Customisable doors and windows on all sides allow the natural daylight to enter and create a majestic ambiance. The drop-down canvas screens allow one to close off windows if more privacy is required.

The outer tent or roof of this unit consists of an 130m<sup>2</sup> custom cut Bedouin stretch tent. Between the outer Bedouin stretch tent and steel frame below there is a customised skirt connecting the two creating an airtight join making this unit suitable for all weather conditions.

The image shows the interior of a large, light-colored tent. The floor is covered with a light-colored, textured material. In the center, there is a bed with a grey, shaggy blanket and several pillows. To the left, there is a wooden chair with a grey seat cushion. A potted plant in a white pot stands near the center. The tent has a high ceiling and a large opening on the left side, showing a view of the outdoors. The overall atmosphere is bright and spacious.

## 360 EXPLORER

The 360 Explorer sports a 65m<sup>2</sup> sturdy galvanized steel frame creating a spacious interior with sufficient room for a fully plumbed bathroom and open plan bedroom lounge.

## SAVANNAH

The Savannah Luxury Tent has a 7.80m x 5.60m sturdy steel frame.

The outer tent or roof of this unit has an 8m x 12m (96m<sup>2</sup>) waterproof flex coated Bedouin stretch tent.

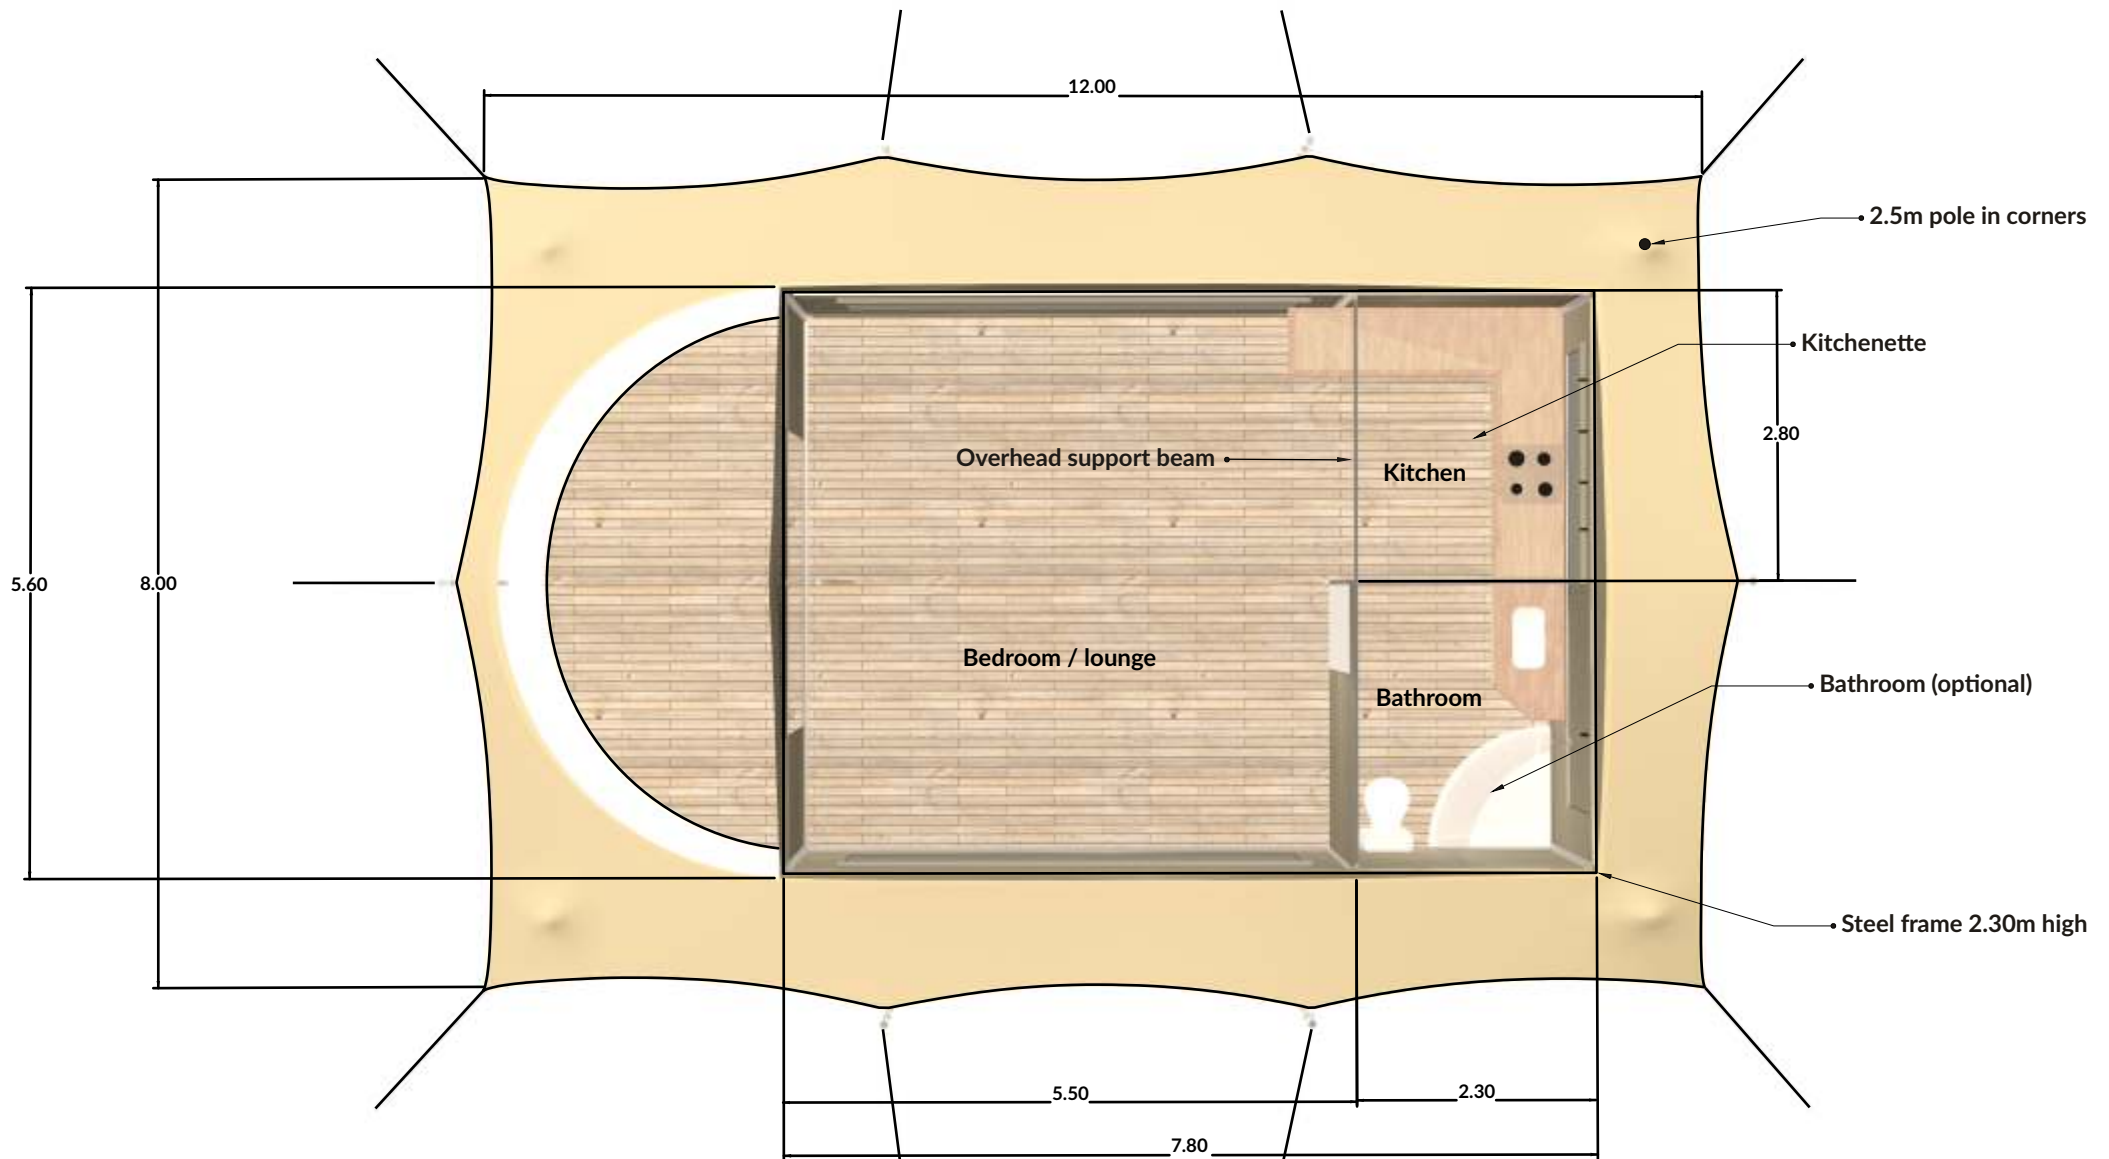

Between the outer Bedouin stretch tent and steel frame below there is a specialised connecting skirt joining the tent to the steel frame creating an airtight join to make the Savannah suitable for all weather conditions.

## SAVANNAH

The Savannah Luxury Tent offers a spacious 43,68m<sup>2</sup> interior living space. This unit comes with a small bathroom and kitchenette area.

# SAVANNAH TECHNICAL LAYOUT

## NOMAD ECO GLAMPER

The Nomad Eco Glamper is our entry level luxury tent.

It is ideal for couples or a single traveler. The modular designs and easy to install systems make this unit extremely easy to setup with only 2 x persons required to complete the unit.

The outer roof consists of a 6m x 9m (54m<sup>2</sup>) waterproof, flex-coated Bedouin stretch tent. There is a seamless join between the roof and the steel frame making this unit airtight and comfortable in all weather conditions.

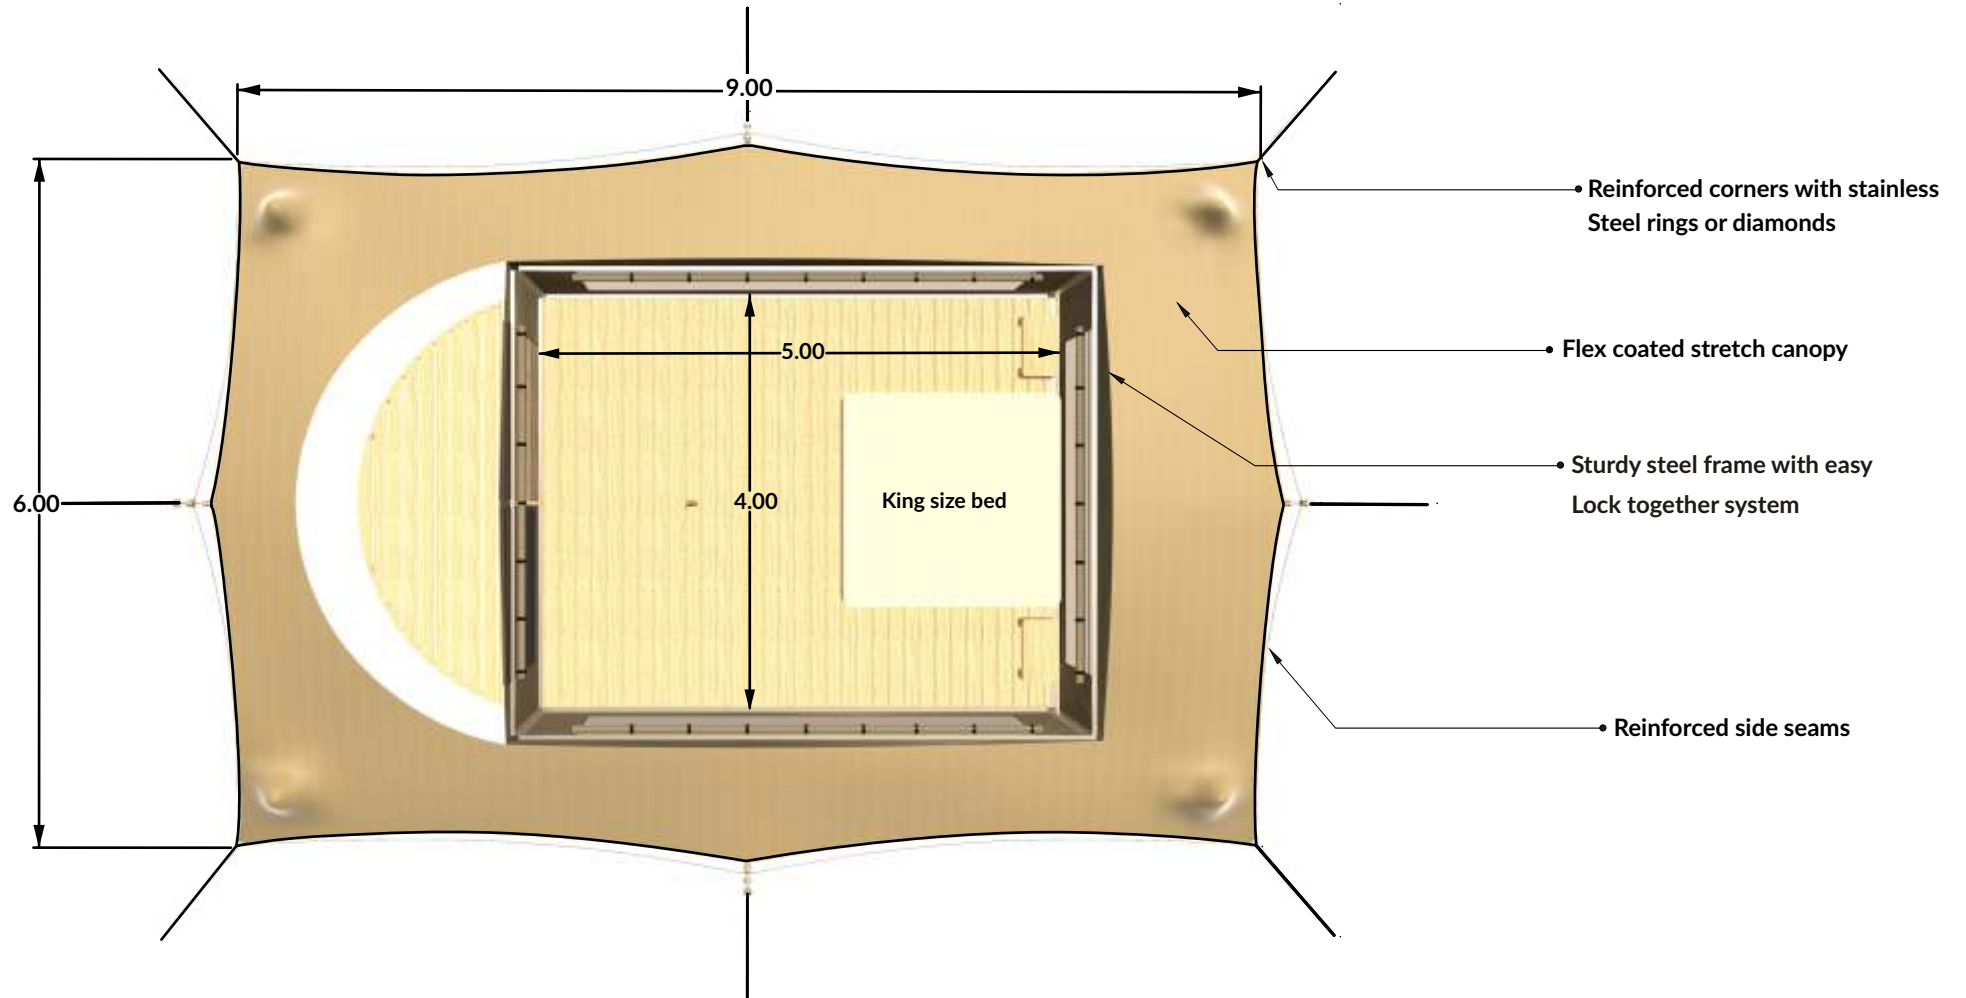

## NOMAD ECO GLAMPER

The Nomad Eco Glamper consists of a 5m x 4m sturdy steel frame creating a comfortable 20 square meters of living space with customisable doors and windows on all sides to allow maximum amounts of natural light into the structure.

## FEATURES ACROSS THE RANGE

### SHADE CLOTH ROOF OVERLAY

Each luxury tent comes complete with a 90% shade cloth roof overlay.

This protects the Bedouin Tent from prolonged UV damage and enhances the life span of the Bedouin tenfold.

Each shade net is manufactured and tailored to fit slightly above the Bedouin stretch tent roof to regulate temperature. Shade nets come in a variety of colours to suit the environment they are setup in. The shade nets have a reinforced 3ply or Matte flex patch stitched onto the positions of the centre poles to prevent abrasion between the two layers.

Our 90% shade cloth products are made from a combination of high-density polyethylene (HDPE) monofilament and tape. All the shade-net products are UV stabilized to withstand harsh weather conditions.

### BEDOUIIN STRETCH TENT ROOF

Our superior quality tents are waterproof, wind and sun resistant and come in a variety of shapes, sizes, and fabric options.

All fabrics have a worldwide fire compliance and safety accreditation with French M2 certification, USA CFM certification and BS British standards certification and are registered with Ten Tech Engineering and Structural certification.

The Bedouin stretch tent roof is custom-tailored and fitted to the steel frame. The Bedouin tent roof can be made in one of two fabric types – premium flex coated or 3ply fabrics. products are UV stabilized to withstand harsh weather conditions.

The image shows the interior of a modern, spacious tent. The structure is supported by thick wooden poles. Large, floor-to-ceiling windows with black frames offer a panoramic view of a natural landscape with a body of water and trees. The interior is furnished with a contemporary sofa, a coffee table, and a patterned rug. The lighting is warm, suggesting a sunset or sunrise setting.

## FEATURES ACROSS THE RANGE

### RIPSTOP SIDE WALLS AND DOORS

Canvas side walls are sourced from a top-quality ripstop fabric.

This fabric is super durable and is designed to withstand all weather conditions. The ripstop fabric comes with fire retardant, antimicrobial and UV color locking properties to ensure longevity of the product.

Canvas side walls can be manufactured in a variety of colours to best suit your needs. Each steel bay comes fitted with a customizable side wall. Side walls can be individually removed and are quick and easy to replace if damaged.

Windows on the structure consists of three layers.

- weatherproof ripstop drop-down layer
- durable mosquito mesh screen
- drop-down clear PVC window

Each of the drop-down layers are fitted with heavy duty YKK zip and slider to close off and eliminate flapping in windy conditions.

Doors are made up of three layers similar to the windows, namely:

- weatherproof ripstop door
- durable mesh screen
- drop-down clear PVC window

Each of the drop-down layers and door comes fitted with heavy duty YKK zips and sliders to close off the tent.

## FEATURES ACROSS THE RANGE

### STEEL FRAME

The steel frame comes in an easy to assemble kit with simple instructions to guide you through the construction process. Each Steel frame is broken down into individual bays that bolt together to form the frame.

- All steel bays are constructed using 50mm x 50mm x 3mm mild steel
- steel frames can be made up in a collapsible form or in predetermined bays
- steel frames can be sent for hot dip galvanizing and powder coating depending on requirements
- The frame is assembled using a simple lock nut and bolt system for a quick and easy construction
- The bottom of the frame is then secured to the understructure using coach bolts if securing into a wood surface or an epoxy anchor and bolt if into a concrete surface

All steel frames are fitted with easy slide Kadar rails for quick and easy installation of side walls.

This is a game changer as each side wall can be individually fitted and replaced if damaged without having to remove the whole tent.

## OPTIONAL EXTRAS

### PVC FLOOR

Tailored PVC floors can be ordered as an optional extra.

These are made with a heavy-duty PVC 550 micron and will come colour-matched to the colour of the tent and side walls. This is ideal in situations where the frame is built over natural ground.

### FIREPLACE FLANGE

Specialised high heat resistant fireplace flanges can be fitted at on request.

These fittings are rated to withstand heat in excess of 225 degrees Celsius and can accommodate a chimney pipe of 150mm to 225mm in diameter.

The Fireplace Flange is a game change in cooler climates.

### WOOD OR ALUMINUM DOORS

On request wood or aluminum doors can be fitted to luxury tents.

Doors can be custom made to specific sizing and come pre-fitted into the steel bays on delivery.

Double glazed safety glass is used on all doors and top of the range locking and latching mechanisms are used.

## FABRICS

# ADVANCED TEXTILES USING STATE OF THE ART TECHNOLOGY

We offer two types of fabric: Matte Flex Coated & 3-Ply.

All our stretch tent fabric products are pre-treated with a water repellent, anti-microbial agent and a Teflon finish to ensure longevity of your tent.

All seams are stitched and welded to ensure a 100% waterproof product.

### DTS 3 - PLY FABRIC

The tensile strength of our new stretch tent fabric outperforms competitors' fabric and is almost twice as strong. Tear strength is greatly improved due to the newly developed interlock knit. Our new fabric will make the Dimensions' stretch tents even more adaptable for different install applications with vastly increased durability.

### 3-PLY FR LIGHT WEIGHT 550

Designed for rental solutions (Fire Retardant and Non Fire Retardant)

- ✓ Ideal fabric for smaller tent setups
- ✓ 100% waterproof
- ✓ Lightweight for increased mobility and portability
- ✓ Translucent fabric offers great ambiance for intimate events
- ✓ UV stabilised

- ✓ Two year warranty
- ✓ Easy to set up, de-rig and transport
- ✓ Available in a range of fun colours, custom colours available for orders 400/m2 +
- ✓ Designed for small rental teams and smaller rental setups

### 3-PLY FR ENDURANCE 750

Designed for durable, demanding rental solutions and permanent installations.

- ✓ Thicker overall finish
- ✓ 100% waterproof & fire retardant
- ✓ Increased blackout
- ✓ High Tensile stretch
- ✓ UV Stabilised
- ✓ Stitched and welded seams
- ✓ Brandable with logo/signage
- ✓ Two year warranty
- ✓ Incredibly durable fabric
- ✓ Available in a range of fun colours, custom colours available for orders 400/m2 +
- ✓ Recommended for rental and semi-permanent installations
- ✓ Dimensions has invested in the future of stretch tent rental with the Endurance 750

## FABRICS

PASSION  
CUTTING EDGE  
RELIABLE  
COMPETITIVE

Stretch tent design and manufacture is at the heart of our business and our passion is to develop cutting edge, reliable products that will impact positively and always be competitive in the marketplace.

### DTS FLEX COATED FABRIC

Our MATTE FLEX range sets a new standard for stretch tent design and usability which we are confident will outperform competitors. In short, this is the Rolls Royce of tent fabrics with a host of features that make it the smart investment choice.

### MATTE FLEX COATED FR 550

Competes with the 750Gsm derivative on quality but in a lighter form factor.

- ✓ 100% waterproof & fire compliant
- ✓ Coated fabric sets new waterproofing and UV stabilisation standards
- ✓ Slick matte finish adds a touch of class and elegance (non-plastic veneer), exclusive to Dimensions
- ✓ Welded and stitched seams and patches
- ✓ Easy to clean and dry
- ✓ Easily add logo/signage for branding
- ✓ Two Year warranty
- ✓ Only stretch tent coated flex fabric to be available in seven colour choices, exclusive to Dimensions
- ✓ Suitable for permanent installations and rental applications

We use a combination of a stitch and weld process to manufacture our tents offering two points of strength: first we stitch the fabrics together when joining and then welding a tape to further makes it 100% waterproof.

### MATTE FLEX COATED FR 750

Our tougher 750Gsm FR is perfect for permanent installations and long-term rental solutions.

- ✓ 100% waterproof & fire compliant
- ✓ Coated fabric sets new waterproofing and UV stabilisation standards
- ✓ Slick matte finish adds a touch of class and elegance (non-plastic veneer), exclusive to Dimensions
- ✓ Welded and stitched seams and patches
- ✓ Easy to clean and dry
- ✓ Easily add logo/signage for branding
- ✓ Two Year warranty
- ✓ Only stretch tent coated flex fabric to be available in seven colour choices, exclusive to Dimensions
- ✓ Suitable for permanent insttch tent rental with the Endurance 750
